

Job description

Construction Project Engineer / Junior Estimator

T&S West

-

Stockton, CA

T&S West is a General Building/Engineering Contractor in Stockton, California and we are seeking a talented, dynamic, intelligent, hardworking Project Engineer to join our rapidly growing company. T&S West carries A, B, and C-10 Licenses with focus on Tenant

Improvements/Remodels, New Construction, Building Maintenance, Electrical, Grading, Paving, Concrete, and Asphalt Maintenance. T&S has maintenance contracts with Railroad Companies and multiple Public Work Agencies. We work closely with private developers, and competitively bid public work projects that range in multiple scopes and operations.

Position Overview:

We are a team of experienced civil and commercial builders. This person will need to have the ability to integrate into a multifaceted company that includes Building and Sitework construction.

The role of a Project Engineer is to coordinate and manage the flow of information to assist the superintendent and project manager in the execution of the project's work.

T&S West Project

Engineers will gain a complete understanding of projects from Project Bid to Completion.

- Manage job controls to ensure compliance with contract, budget, schedule, forecasting and job costing.
- Develop and maintain project schedule to ensure work is completed on time and under budget. This includes managing and coordinating subcontractors' schedules.
- Manage project engineering assignments to ensure work is completed on time and under budget.
- Manage project engineering activities to ensure compliance with company, contract and schedule requirements.

- Provide technical support in construction planning, quality control, interpretation of design, application of construction methods, resolution and documentation of design conflicts, and constructability reviews to ensure successful job completion.
- Develop, implement and administer project engineering procedures and other work controlling documents to ensure clarification of roles.
- Represent company, project and/or department during client and project management meetings to ensure effective communication.
- Develop and maintain all job reporting and logs to ensure project compliance.
- Provide technical support and direction regarding project material controls including delivery dates, construction schedules and design requirements to ensure additional costs are minimized.
- Prepare drawings and sketches to support construction work, change orders, and estimates to meet changing job requirements.
- Develop job essential data including quantity take-offs, material price lists, labor costs per man hour, and equipment to ensure accurate estimates and bids.

Experience

- 2+ years of Project Engineering, Management, or similar experience
- Bachelor's degree or equivalent, preferably in Construction Management, Architectural Engineering, Civil Engineering, Architecture or a Construction Management Certificate from an accredited university
- Applicable internships or field experience preferred
- Computer literate. The ideal candidate will have a working knowledge to an advanced aptitude of HCSS Heavy Bid, MS Office Suite, (Outlook, Project, Excel and Word), AutoCAD, CM Software
- Valid Driver's License

Necessary Skills

- Understands and interprets schematics, blueprints, drawings, and technical specifications.
- Can layout, survey, schedule, and read drawings, in order to apply construction sequence.
- Can interpret oral and written instructions and directions from supervisors.
- Proven ability to multi-task, change priorities, and handle stress to meet deadlines.

Benefits and Compensation

- Benefits include medical insurance, 401k plan, and Cell phone reimbursement
- Vehicle Allowance
- Competitive Salary, to be commensurate with experience

We are an Equal Employment Opportunity employer. Position requires clean DMV record, background check and drug testing.
