

**Sr. Project Manager | Bay Area**  
**\$165-190k, Excellent Benefits**  
**On-Site, Full Time, Direct Hire**

We are actively seeking a top-notch Sr. Project Manager to join our client's leadership team to successfully manage construction projects throughout the Bay Area. Our client has unrivaled expertise and a reputation for creating unparalleled value by using the latest in machinery and technology. With over 45 years of combined knowledge and experience, they have earned their spot as a national leader in their industry! If you are a highly motivated, safety-oriented, and results-driven individual with a passion for project management [apply now](#) or call Aileen today at 888-303-5627 for more information!

**Key Responsibilities**

- Represent the company as the managing party by interacting with clients and promoting a positive image for our company while ensuring project profitability.
- Manage project scope, risks, and issues, as well as effectively communicate progress and updates to stakeholders.
- Review bids in collaboration with Estimating to ensure that the anticipated scope matches the bid and contract.
- Collaborate with the Superintendent and Foreman to create a Pre-Plan for construction means, methods, and sequence, ensuring that any changes to the plan are coordinated with all project stakeholders.
- Effectively interpret plans and specifications, estimating costs and quantities of materials needed, while coordinating timely purchase of supplies.
- Supervise job sites to ensure that standards of construction performance, including safety, compliance, cost, and schedules, can be reasonably achieved.
- Negotiate with owners, contractors, subcontractors, and suppliers as necessary and ensure payments.
- Consult with architects, engineers, and other technical workers to eliminate conflicts between contract documents and design intentions.

**Key Qualifications**

- 5+ years' experience, managing and mentoring a team of up to 5 project managers - required
- Bachelor's in Civil/Construction Engineering or Construction Management desired
- Technically skilled in; MS Office, Prolog Manager, Viewpoint CSS, and/or Hard-Dollar preferred
